

- ✓ Customizable Dashboards
- ✓ Role-based Access Control
- ✓ Secure API
- ✓ Multiple Integrations
- ✓ Automated Report Generation

DashMagiq® Unified Management Console

Centralized dashboard to simplify the way you monitor, gather, present, and analyze data

- Monitoring **separate dashboards** of each Cybersecurity software (some have 100+) deployed in an organization is **tedious, cumbersome, and expensive**
- Cybersecurity teams **spend several hours** in a day just on consolidating data and making reports in required formats **for compliance purposes**

- DashMagiq® UMC is a **secure and scalable specialty middleware** that can pull in **near real-time data** from various monitoring tools and **present customizable role-specific consoles**
- With **apt and on-time reporting**, analyze and control cybersecurity incidents more smartly

- 50% reduction** in time and money spent on consolidating data
- Scheduled automated reports** in required formats for compliance
- Role-specific customizable dashboard** for all stakeholders
